Small strap for relaxed wearing

Removable overhead elastic straps, fastened with concealed plastic buckles

Concealed metal nose strip for fitting

### Filters for WildCat

A disposable respirator can be used in conjunction with WildCat either under the hood ( best face fit ) or can be inserted into the integral filter pocket. The filter will assist in vapor & particulate absorption/filtration. The choice of respirator is yours. We offer the 3M™ Aura™ Disposable Respirator range in P2 and P3. This fold flat respirator is easy to carry when on the move and individually packed.

**Limitation:** This type of filter doesn't block fire gases, like carbon monoxide, so don't assume you can advance further into the fire. Throw it away and replace with a new one when filter becomes difficult to breathe or becomes damaged.
