

ETF 9WMPN

Flame retardant and heat protection balaclava.

Pull-on style hood with bound face. The hood shall provide basic protection for the wearer against brief contact with flame and a combination of convective and radiant heat. Open shoulder design to minimise the wearers risk of heat exhaustion.

Composition

210gsm 1x1 Rib Knit
59% Modacrylic, 39% Cotton,
2% Elastane

Size
